

Krishna Rajbanshi

Temporary Address: Tyanglaphat, Kirtipur, Kathmandu

Permanent address: Mechinagar-14, Jhapa, Nepal

Phone: 9808477923 | Email: krajbanshi1148@gmail.com

Career Objective

MSc Environmental Science student with hands-on experience in field data collection, quantitative assessments, statistical analysis, and community outreach. Seeking to contribute technical rigor in data quality assurance, field monitoring, and reporting to Action For Nepal's project tracking, indicator monitoring, evidence generation, and learning frameworks as a MEAL Associate. Fully available and prepared for extensive field travel and remote duty stations across Taplejung, Khotang, and Solukhumbu.

TECHNICAL SKILLS & COMPETENCIES

Monitoring, Evaluation & Data Analysis: Quantitative/qualitative survey design, KoboToolbox / ODK digital data collection, Data Quality Assurance (Accuracy, Completeness, Timeliness), indicator tracking sheet management, statistical data analysis (MS Excel, R).

Field Research & Safeguarding: Household surveys, disaggregated data collection (age, gender, disability), literature review synthesis, technical report writing, cross-cultural communication, GEDSI (Gender Equality, Disability, and Social Inclusion) awareness, and commitment to Child Safeguarding / PSEAH standards.

Digital Tools & Systems: WordPress site management, web analytics tracking, digital content optimization, MS Office Suite, and database/data entry management.

Geospatial & Environmental Tools: Basic ArcGIS / ArcMap & QGIS (Suitability Modeling, Layer Digitization, Boundary Extraction), Google Earth Engine (NDWI analysis), physico-chemical water quality testing.

Languages: English (Professional), Nepali (Native), Rajbanshi (Native/Fluent), Hindi (Fluent).

Experience

Central Bureau of Statistics — Data Collector

Oct 2021

- Executed household surveys for Nepal's National Population Census, adhering strictly to Data Quality Assurance standards (Accuracy, Completeness, and Timeliness).
- Collected disaggregated field data across diverse socio-economic and demographic groups in compliance with ethical field protocols.
- Assisted in validating, cleaning, and organizing collected field data for national reporting and statistical analysis.

ISET, Nepal — Research/Technical Intern

- **Duration:** May 2026 – June 2026 (Short-term Intensive Research Internship)

Context: Mandatory academic internship completed as part of MSc 3rd Semester curriculum.

- **Key Responsibilities:** Conducted literature reviews, summarized technical reports, and organized environmental datasets.

SmartSites, Nepal — Intern/Junior Web Developer (Jan, 2023 – Dec, 2024)

- Managed organizational web platforms and WordPress databases, ensuring accurate data organization and system functionality.
- Applied web analytics to track digital engagement metrics, content reach, and user reporting data.
- Performed documentation updates and digital publishing for organizational reports and technical blogs.

Prayas Prarambha, Jhapa — Volunteer (April 2019)

- Coordinated field logistics, transportation, and scheduling for community-level environmental campaigns.
- Facilitated public awareness sessions on local pollution levels and presented findings to municipal stakeholders.

Projects

Short Research & Awareness Program on Air Pollution (April 2019)

- Conducted field research on air pollution impacts in Mechinagar Municipality and presented detailed summary reports to local representatives.

Limnological Assessment & Environmental Driver Modeling (Taudaha Lake)

March, 2026

- Conducted field sampling and statistical analysis of physicochemical water quality parameters (e.g., Free CO₂, DO, pH) to identify drivers of ecological stress and fish mortality.
- Formulated data summaries, visual trends, and technical reports to support evidence-based environmental monitoring.

Education

Mechi Multiple College, Bhadrapur, Jhapa — BSc. in Environmental Science (2022)

- Major: Environmental Science
- Relevant coursework: Conservation Biology, Environmental Impact Assessment
- Thesis: Invasive Alien Plant Species (IAPS) Impact on Local Ecosystems

Central Department of Environmental Science, TU, Kirtipur — MSc in Environmental Science

Status: 3rd Semester Completed / Enrolling in 4th Semester (Thesis Track)

Major: Freshwater Environment

Availability: Coursework completed; flexible schedule available for full-time field & project assignments alongside thesis research.
